

HydroLush Patented Vertical Hydroponic GrowTube™ Systems

 **Install on Balconies, Rooftops or Walls**
*Ultra-efficient use of space, energy and water

 **Convenient, Relaxing; Work Standing Up**
* No aching back or sore knees

 **Designed for Leafy Veggies & Herbs**
*Grow: lettuce, basella, spinach, gynura, basil, mint, oregano, water spinach, amaranth, etc.

 **Easy to Maintain**
* No Pesticides or Weeding;
Just Add Water & Mix Nutrients

 **Simple, Durable, Lightweight**
*Quick to Install; Easy to Move

 **Enjoy Fresh, Nutritious and Safe Veggies Everyday** *Tested & Certified Nutrients

HydroLush is focused on developing simple and affordable hydroponics tech for urban consumers. Hydroponic gardening doesn't need be a complicated, expensive enterprise using indoor grow beds and specialized lighting.

Our **vertical hydroponic GrowTube™ systems** make it easy to grow green leafy vegetables, herbs and flowers around your home. GrowTube™ systems will perform well installed outside in direct natural sunlight or indoors under full spectrum grow lighting. Contact us for more information on products and services.

Welcome to the
New Age Urban Garden
Grow Herbs & Vegetables
at home using
Vertical GrowTube™ Hydroponics

Growing Fresh Veggies
is Safe and Easy using
THDC GrowTube™ Systems

GrowTube™ Gardens install quickly, are convenient to use, simple to maintain and grow beautiful leafy green vegetables, herbs and flowers year round!

Advantages of Vertical Hydroponics over Traditional Growing Techniques:

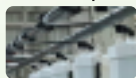

Hydroponics is a growing technique that does not use soil. Instead, plants are fed a water/nutrient mix containing everything needed for growth.

- Efficient Use of Space**
* 3 to 8 times the produce
- Efficient Use of Inputs**
* Requires less electricity,
water and nutrients
- Faster Growth - Higher Yields**
* Efficient nutrient delivery and
root zone aeration
- Reduced Labor & Burden**
* Does not use Soil,
Self Watering

HydroLush Proprietary Vertical GrowTube™ Systems have several Major Advantages:

- * Simple to Install;
Easy to Move
- * Durable, Light, Reusable
- * Reduced Pest Problems
- * Grow in Eco-friendly
Natural Coconut Fiber
- * Proprietary Design Controls
Water Delivery and Drainage
Control Root Zone moisture; Minimize System Leakage
- * Root zone remains well drained and aerated
even during heavy rains
- * Can be Installed Outdoors in Direct Natural SunLight
or Indoors under Full Spectrum Grow Lighting

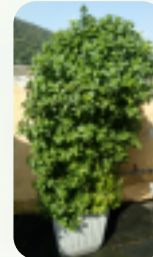

Tower Container Systems

Great for Balconies or Indoors

Dual Tower Vertical Hydroponic GrowTube™ Planter System

HL-PSYS-201

*Systems Include:
Vertical GrowTubes, Pipes,
hoses, fittings, Pump &
controller, Reservoir Tank,
Planting Tool, Starter
Nutrient Kit*

Quad-Tower Vertical Hydroponic GrowTube™ Planter System

HL-PSYS-401

Wall Mounted Systems

Convenient, Space Saving

8 Tube Wall Mounted Vertical Hydroponic GrowTube™ System

HL-PSYS-821

Rack Systems

Free Standing, Large Capacity

8 Tube X-rack Vertical Hydroponic GrowTube™ System

HL-PSYS-811

Customized Systems - we have the hardware, equipment and experience for smooth installations to make your system operational fast! Please contact us for details.

Specialty Hydroponic Nutrients

Using hydroponics, growers are able to finely control the type and amount of nutrients the plants receive. Hydroponic nutrient concentrates contain macro and micro nutrients in a water soluble form specifically designed to work well in a soilless environments. Soil fertilizers and organic fertilizers are usually not a good choice in hydroponic systems without special techniques.

HydroLush® Hydroponic Nutrients are available in a three part, government certified formulation especially designed for leafy green vegetables and herbs. Our nutrients are convenient and easy to use, safe and non-toxic. A multi-part formula gives you the ability to adjust the reservoir mix to better suit the different stages of plant growth.
